WOMEN IN THE MILITARY

The Veterans National Memorial Shrine and Museum 2122 O'Day Road in Fort Wayne has announced plans for a new monument honoring all women who served in the United States Military. Commander Greg Bedford says that “ This memorial is long overdue. We have talked about erecting a monument consistent with the huge commitment made by women in the military and those that served here at home in factories support the fighting men overseas during the World Wars.” The monument is constructed of limestone and India red granite materials. The three piece vertical monument features a full color graphic on the centerpiece flanked by two matching panels listings women who made significant contributions during their military service. The Veterans Memorial is now undertaking a fund raising effort to finance the monument. Completion date is set for August of 2026. During the Month of March, Women’s History month, UAW Local 2209 will be conducting fundraisers to donate to building this monument. If you would like to help, please email signup@uaw2209.org. Please provide your telephone number, shift and department in your email.
